

M365 → AI TRIAGE → SLACK

Never miss what matters.

BY PAYSYS | AI inbox triage that routes what needs you, straight to Slack

M365 INBOX WATCH

LLAMA 3.1 TRIAGE

SLACK ACTION ITEMS

AUTO-DONE

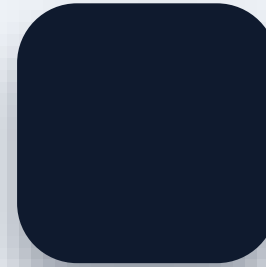

Watches your inbox, classifies every email, posts what needs you.

An AI agent watches your Microsoft 365 inbox, reads and classifies every message, and posts only the items that need your action straight to a Slack channel.

M365 Inbox

Llama 3.1 classifies

Slack

Action items posted

A one-time setup, then it runs itself.

~ 2 minutes

- 1 Type `/setup` in any Slack channel
 - 2 Open the Microsoft sign-in link the bot DMs you
 - 3 Enter the code & sign in with your work account
 - 4 Fill the preference form — **name, aliases, types**
-  **Done once. Connected forever — you never repeat this.**

Eight categories of mail that need a human.

Every message is sorted into the types that matter. You choose which ones get posted.

● Approvals

● Decisions needed

● Attention needed

● FYI / informational

● Reviews / sign-offs

● Feedback requests

● Escalations

● Advice / guidance

CONFIGURABLE ◆ Pick the categories during `/setup` — change them anytime.

Your action items, posted where you already work.

MANAGE WITH ONE TAP

- Done #1

Marks task #1 as completed.
- Done #2

Marks task #2 as completed.
- All done

Clears every open task at once.
- No changes

Acknowledges — leaves all as-is.

Signal, not noise.

Four filters keep the register clean — so a posted task always means something genuinely needs you.

To vs CC

Only flags CC'd mail if you're named personally.

Auto-done

Reply from Outlook → the task closes itself.

Thread-aware

Won't duplicate tasks from one thread.

Spam-free

Newsletters, auto-replies & FYIs filtered out.

A scan rhythm that fits the workday.

- 09:00 AM  **First scan**
Catches overnight email before the day starts.
- Hourly  **Recurring scans**
Keeps the register current through the workday.
- 09:00 PM  **Last scan + end-of-day summary**
A clean wrap-up of what's still open.
- Next day  ***"Yesterday you completed 8 tasks."***

Commands, and what happens under the hood.

SLASH COMMANDS

<code>/setup</code>	Sign up, connect Microsoft & set preferences.
<code>/pause</code>	Temporarily stop monitoring your inbox.
<code>/status</code>	Check your current configuration.

UNDER THE HOOD

- 1 Agent fetches your **10 latest emails** from Microsoft 365.
- 2 **AI (Llama 3.1)** reads & classifies each new email.
- 3 Actionable emails become **numbered tasks** in Slack.
- 4 **Thread context** prevents duplicates & false positives.
- 5 Reply from Outlook → task **auto-marked done**.

From inbox overload to a **clean action register.**

Every message read, classified, and routed — only what needs you reaches Slack.

✚ Type **/setup** in any Slack channel to begin
